A Straumann Group Brand

UNLOCK THE POTENTIAL OF YOUR SMILE.

Unlock the potential of your smile with ClearCorrect.

ClearCorrect® aligners are the expert's choice and are custom-made just for you. Providing you with cutting-edge innovation, technology, and the doctor-developed products you deserve, ClearCorrect brings you a unique, personalized orthodontic experience that is discreet, fast, and comfortable.

Empowering experience

Live your life on your terms, while discreetly and comfortably straightening your teeth.

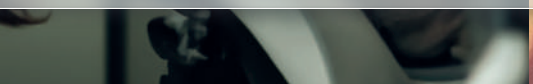

The expert's choice

ClearCorrect works closely with your doctor to provide you with customized orthodontic treatment, designed to achieve the results you want.

Smile with confidence

Smile with confidence knowing that decades of research and innovation are driving your treatment.

LIVE LIFE ON YOUR TERMS.

No compromise. No hassle.

ClearCorrect aligners are removeable, so you can eat, drink, and take care of your teeth as you normally would. In fact, you can wear them or remove them as you see fit during any of your daily activities with no added risk of irritation or injury.

ClearCorrect can help you change your life without changing your day-to-day.[1]

An empowering experience, and a more discreet treatment.

Show off your smile, not your treatment.

ClearCorrect aligners are nearly invisible, so most people won't even know you're wearing them. They also stay clear: studies show that ClearCorrect aligners resist stains better than other brands.[2]

For the ultimate comfort.

Don’t sacrifice comfort for straight teeth.

Compared to wires and brackets, clear aligners are proven to be more comfortable.[3] ClearCorrect also improves comfort by applying less initial pressure than other aligners on the market.[4]

Our advanced technology provides a more custom and comfortable fit for a variety of dental situations.

Comfortable

Hassle-free treatment.

How it works.

1. **Your first appointment.**
   Talk to your doctor to see if you're a candidate. They'll evaluate your smile by taking dental records (usually with an intraoral scanner) and examining your overall oral health. Ask your doctor about any available payment and insurance options, which can make treatment even more accessible.

2. **Your treatment plan.**
   We'll work with your doctor to develop your digital treatment plan—the strategy for how your teeth will move and what techniques your doctor will use to move them. Your doctor can even share the treatment plan with you so you can see your planned smile before starting treatment.

3. **Your treatment.**
   Once your aligners are ready, your doctor will verify the fit of the aligners and will provide you with additional instructions based on your unique treatment plan. From there, simply wear the aligners 22 hours a day. They'll move your teeth little by little with each aligner, each day bringing you closer to the smile you deserve!

The experts' choice, driven by doctors.

With 17 years in orthodontics, ClearCorrect is the clear aligner choice of experts. We'll work closely with your doctor to create a clear aligner treatment that's just for you!

ClearCorrect was founded by doctors, and we continue to work closely with clinicians all over the world to make an excellent clear aligner experience from start to finish. Whether it's our internal clinicians, our close partners, or even your very own dentist, each of them is essential to the ClearCorrect process, and we work as a team with each of them to put your treatment at the center of it all.

Real results for real patients.

Your smile is unique. That's why ClearCorrect is tailored exactly to your needs, with specialized features that help give you the smile you deserve.

Smile with confidence knowing that ClearCorrect aligners were developed from decades of research and innovation.

ClearQuartz: Industry-leading material.

ClearCorrect aligners are made from ClearQuartz®, an industry-leading tri-layer plastic material that improves comfort and clarity while maintaining durability.

Performance trimline.

Our ClearQuartz material works together with our Performance Trimline to give you better results.

Our unique design is proven to help your doctor have more control over how your teeth move during treatment[4], helping you both achieve your goals.
